HEAD LAMPS

Let's say it straight... we love our head lamps and are crazy about all the options this type of product offers. The combination of good lighting and being able to have both hands free while you're working is nothing short of brilliant.

Our range of head lamps features 5 different products that together cover all the requirements for a modern head lamp.

You will notice that from 2019, our product guarantee for high-end products has been extended to 5 years. The explanation is quite simple. Our products are designed so they quite simply just keep working.

H600-R 700H600-R

We introduce the H600-R as our new flagship head lamp.

This latest technological development - including the ability to control LED heat emission - means that we can introduce a head lamp built around a 10W LED bulb. It's no exaggeration to say that this head lamp exceeds all expectations for the amount of light a head lamp can deliver.

Use the zoom function to focus the beam, activate maximum light output and you will, for example, be able to see every small movement at the edge of a forest 200m away.

The H600-R is not the head lamp for the professional user who "just" wants a lamp for casual daily use. However, for those who need a

state-of-the-art head lamp that can be used in any situation, the H600-R is the ideal product. Believe us when we say that this head lamp will never let you down. The H600-R is designed with a unique battery solution that means that you will never run out of power. An intelligent easy-to-open battery base allows for very easy exchange of the rechargeable battery – less than 5 seconds and the battery has been changed!

As an extra option, we also offer the H600-R as a kit (Elwis number 700H600KIT) with 1 H600-R, one charger and two extra batteries. It goes without saying that this feature means that the H600-R sets new standards for what a head lamp can be used for.

Recommended usage:

Professional Craftsmanship, Outdoor, Off-shore, Industrial, Off-road

Packaging:

Attractive box with user manual, interchangeable/rechargeable battery + charging cable (Type-C USB).

INTER-CHANGEABLE + RECHARGEABLE

5 YEARS GUARANTEE

85 AND 630 LUMENS

RED SAFETY LED IN BACK

H1700H1

Elwis H1 is a professional lightweight head lamp that offers great work light due to an extra wide beam angle.

Since we introduced the 1st version of the H1 head lamp 6 years ago, this head lamp has been super popular and among our best selling products. It is a lightweight head lamp that offers superb work light because of an extra wide beam angle.

With a total weight of 130 grams only (batteries included) this head lamp is extra comfortable to wear during a long work day.

The lamp has been developed using the best components possible to create an especially robust product.

The use of dry cell batteries comes with the advantage that batteries can be replaced quickly and wherever you are.

H2-R700H2-R-A OR B

The H2-R head lamp is a true workhorse and possibly the most versatile head lamp you can dream of.

Powered by a 2600mAh rechargeable battery and fueled by a 5W Cree LED, this head lamp sparks out a fantastic 420 lumen and will do so for a long time! Even at high mode, the battery will last up to 4 hours (10% output after 4.2 hours). Adjust the light to low mode (82 lumen output) and you enjoy great work light for up to 12 hours.

With a total weight of only 163 grams and the battery pack placed in the back this head lamp is super comfortable to wear regardless of what you use it for. This is exactly what the Professional craftsman or outdoor enthusiast needs. The twist style optical focus system allows you to adjust the light angle exactly as you need it.

As an extra feature, the H2-R comes with a red light (8 lumen) in the back of the head lamp that warns people behind that there is someone ahead of them.

700H2-R-A comes with a charger for EU plugs, 700H2-R-B comes with a charger for UK plugs.

H3700H3

Elwis H3 is a professional lightweight head lamp that comes with zoom function.

The Elwis H3 head lamp is based on the same product platform as the H1 head lamp. The head/lens of the product has been designed differently, though, and the H3 comes with the ability to zoom in the light when great work light is needed at longer distance.

The use of dry cell batteries comes with the advantage that batteries can be replaced quickly and wherever you are.

One good feature of the H3 is that we have given the lamp a light output of 110 lumen in "low mode". In most situations, 110 lumens is enough to offer great work light and at this mode the batteries will last up to 9 hours.

H4-R700H4-R

The H4-R is yet another high-end head lamp that provides unbelievable value for money as well as red night light.

We'll stick our necks out and say that every professional craftsman and outdoor enthusiast needs a HR4-R in their toolbox or rucksack. We have placed the battery pack at the front (behind the lens) and added a simple (but robust) head strap. This means that when folded up, the head lamp only measures 4 x 5 cm!!! This, combined with an overall weight of just 109 g means that the H4-R is the perfect tool for any professional craftsman or mechanic working on his or her back under a vehicle, as well as being an indispensable companion for the outdoor enthusiast.

As a special function, we have put two small diodes at the front of the lamp that deliver red night light. Hold the on/off switch down for two seconds to activate the red light.

The H4-R is powered by a rechargeable battery which can also be exchanged by 3 X AAA batteries!

FLASHLIGHTS

Who doesn't love a good flashlight and the pleasure of lighting up a dark room/space with just one click... we certainly do!

With 9 different product variations to choose from, our range of flashlights is more extensive than ever. Four of these comes with a packaging suitable for sale in shops. The other 5 are (as previously) presented in an attractive coloured box for sale "over the counter".

In 2019 we are extended our product guarantee (for high-end products) to 5 years. The explanation is quite simple. Our products are designed so they quite simply just keep working, so we might as well extend our product guarantee to 5 years!

P610 700P610

The P610 is an extra powerful flashlight that delivers an amazing 610 lumen output.

If you require a lot of work light, look no further than the P610 flashlight. This flashlight features a 10W Cree LED that really delivers a powerful light. Believe us when we say that you will be amazed by the bright and clear work light offered by this product.

This flashlight comes with a zoom function. Focus the beam, activate maximum light output and you will, for example, be able to see every small movement at the edge of a forest 200m away.

In spite of its unbelievably strong beam, the P610 only weighs 173 g (including batteries) and can easily be carried in a jacket pocket. This makes it an extremely versatile flashlight for both indoor and outdoor use.

Product packaging is designed with a smart TRY ME" function. This allows for testing in the store/shop without opening the package.

IP65

S8 700S8 A OR B

The S8 is a rechargeable flashlight that has every feature one could wish for in a professional flashlight.

Elwis S8 is really a powerful high-end flashlight that delivers a fantastic 810 lumen!

It has been designed for outdoor use in any weather condition. This flashlight is IP65 rated as it is designed with a unique “turn to cover” function that ensures complete protection/sealing of the Micro USB charging input (it is sealed when the flashlight isn’t charging). This eliminates any risk of moisture and water entering the device.

The S8 flashlight is powered by a 2600 mAh rechargeable battery that gives up to 4 hours of light - even at high output mode. It comes with two separate chargers that allows for both 220V charging + 5V charging in for example a car.

For good reasons, the Elwis S8 flashlight is the preferred flashlight of many Professionals.

700S8A comes with a charger for EU plugs.
700S8B comes with a charger for UK plugs.

Recommended usage:
Professional Craftsmanship, Outdoor, Off-shore, Industrial, Off-road

Packaging:
Box. Rechargeable battery, charging cable, pouch, lanyard and charger included.

S1 700S1

Elwis S1 is a multi-functional flashlight enjoying great popularity.

Since we first introduced the S1 flashlight (version 1) eight years ago, this product has really proved its worth.

In short, it is a very versatile product. For instance, one great feature of the S1 is stepless dimming (10% - 100%). This means that the light output can be adjusted to give you exactly the light intensity that you need.

Other functions, such as an automatic SOS signal is also built into the S1. Needless to say, it also comes with a zoom function.

The flashlight delivers a 420 lumen light output and it is powered by 4 x AAA batteries. This product is IP65 rated.

Recommended usage:
Professional Craftsmanship, Outdoor, Off-shore, Industrial, Off-road

Packaging:
Box. 4 x AAA, pouch, and lanyard included

S5 700S5

The S5 is quite simply designed to deliver incredible value for money.

Our S5 delivers exactly what you need from a flashlight in most situations. A good, strong beam with great light quality, as well as the ability to focus (zoom). Add to this the fact that the S5 is supplied with a smart belt pouch that only weighs 39 g. What more can anyone want from a professional flashlight for everyday use?

Recommended usage:
Professional Craftsmanship, Outdoor, Off-shore, Industrial, Off-road

Packaging:
Box. 3 x AAA, pouch, and lanyard included.

S7 700S7

The S7 is our entry level professional flashlight.

The S7 is the perfect choice when you need a flashlight that does not take up much space. The flashlight comes with a clip and with a combined weight of just 58 g makes it ideal for clipping into your shirt pocket! In short, this is a product you will always have at hand.

The lifetime of 2 AAA batteries is up to 3 hours. The flashlight has a fixed beam and can deliver an effective working light within a field of 5 meters.

Recommended usage:
Professional Craftsmanship, Outdoor, Off-shore, Industrial, Off-road

Packaging: Box. 3 x AAA, pouch and lanyard included.

S9 UV 700S9

Our S9 is a specially developed product that delivers UV light in the spectrum of 395-410nm.

This product is suitable for use in the inspection of the aircon systems of cars, or checking currency notes, DNA marks etc. The S9 comes with a 395-410 nanometer, i.e. UVA (long wave) as opposed to UVB (280-315nm medium wave) and UVC (200-280nm) which can damage the skin and should only be used by professionals used to working with UVB/UVC light.

Recommended usage:
Professional craftsmanship, DIY, Industrial, Off-road

Packaging:
Blister pack. 1 x AA battery included

NEW SERIES OF MULTI-FUNCTIONAL LED LAMPS

This year, we introduce 2 new products with a revolutionary design and build. These are products that offer true multi functionality. We consider them as “crossovers” in between traditional flashlights, head lamps and inspection lamps.

N400-R 8N400-R

Combined head lamp and mini work lamp.

Elwis N400-R is a unique combination of a head lamp and a mini work lamp.

On one hand, N400-R is a great head lamp that offers a bright and clear work light with a wide beam angle.

On the other hand, the lamp can be detached from the head strap so it can be used as a stand-alone work lamp.

As with other Elwis work lamps it fastens to any magnetic surface (magnet in the bottom). It also comes with a steel clip allowing for the lamp to be fastened to a belt or pocket.

With a light output of 400 lumen, this product will supply great work light. It comes with a rechargeable 800mAh Li-ion battery.

Recommended usage:
Professional craftsmen, technicians and outdoor enthusiasts.

Packaging:
Cardboard blister, manual, USB - MICRO USB charging cable

INSPECTION LAMPS

We have been producing great work lights for workshops and industry since the middle of the last century and inspection lamps remain an integral part of our DNA.

In our 2020/2021 range, we have 8 different inspection lamps for every type of work situation.

Our two flagship products come with a unique concept that ensures that, as a professional, you will always have an effective working light throughout your working day - using just one inspection lamp.

C150-R 14C150-R

Inspection lamp and pencil light in one

The C150-R is a super handy flashlight and inspection lamp with all the advantages that comes with a small and lightweight product. The C150-R provides 150 lumen in the front light and 70 lumen in the top flashlight.

As a backup inspection lamp and a work tool always at hand wherever you go in the workshop – the D0 is a perfect solution.

It weighs only 37 gram and can be clipped onto either a shirt pocket or a belt or you can use the magnet in the back. Fast charging via USB-C.

Recommended usage:
Professional Craftsmanship, Industrial and automotive

Packaging:
Attractive box with user manual and charging cable (type USB C)

C350-R 14C350-R

Very durable handlamp with high CRI

C350-R is a very durable hand lamp designed for professional electricians, technicians and mechanics.

This hand lamp has been designed to withstand the harsh environment in the workshop. It is IP65 rated and we have done anything possible to protect components from external shocks.

It offers a very high light quality. Also, it comes with CRI 95+ to offer a light color as close to natural light as possible.

Built-in magnets in both the bottom and on the backside of the product allows for easy fastening in various positions. It also has a built-in hook.

Approximately 5 minutes before the C-350 runs out of battery, it will flash 5 times. The idea is to help the mechanic/electrician not to forget the lamp in a dark work environment.

C350-R is a part of the Elvis Battery concept with easily replaceable batteries.

Recommended usage:
Professional Craftsmanship, Industrial and automotive

C600-R 14C600-R

The C600-R is a newly-developed Elvis inspection lamp, designed with our new unique battery solution.

The C600-R is our take on an inspection lamp that gives you incredible value for money.

It is a professional inspection lamp that has been designed from A to Z using the best components on the market and with top quality construction. All its sensitive components are protected as effectively as possible. Put bluntly... this lamp can easily stand being dropped on the floor.

In the workshop, full beam (the C600-R is 600 lumen) can sometimes be too bright. We have therefore designed the C600-R with a user-friendly dimmer that can dim the brightness from 15 – 100%.

As an extra feature, the C600-R is equipped with a 100 lumen torch in the top.

The C600-R is designed with our unique battery solution with easily replaceable batteries. For instance, buy the C600-R as a kit (Elvis number 700C600KIT) in which one C600-R is supplied with 2 extra batteries and a charger. With this solution, your C600-R will set new standards for what you can expect from an inspection lamp.

Recommended usage:
Professional workshops and autorepair, industrial, outdoor, off-shore, off-road

C610-R 14C610-R

No more running out of power with your mobile inspection lamp - even though you've been using it all day!

The C610-R is a completely newly-developed Elvis inspection lamp that provides everything you've come to expect from an Elvis lamp... plus a bit more

Let's begin with the basics... the C610-R delivers nothing less than the perfect working light, illuminating narrow spaces no other working light can reach. This is an inspection lamp that comes into its own in workshops where light is required in confined spaces - a cramped engine compartment, for example.

A good inspection lamp should also be dimmable. In the workshop, full beam (the C610 is 600 lumen) can sometimes be too bright. We have therefore designed the C610-R with a user-friendly dimmer that can dim the light output from 15 – 100%.

And, of course now there's no more running out of power after a couple of hours work and having to replace one inspection lamp with another! The C610-R is designed with our unique battery solution which means in practice that it's really easy to replacharce the rechargeable battery.

The battery can be replaced in less than five seconds! Buy the C610-R as a kit (Elvis number 700C610KIT) in which one C610-R is supplied with 2 extra batteries and a charger. With this solution, your C610-R will set new standards for what you can expect from an inspection lamp.

Recommended usage:
Professional workshops and autorepair, industrial

Packaging:
Attractive box with user manual, rechargeable battery and charging cable (type micro USB).

600 LUMENS

IP65

D0 14050

The D0 is a super handy inspection lamp with all the advantages that comes with a small and lightweight product.

To be fair, the D0 does not provide the work light needed for a long days work in a Professional work environment. We would not recommend this product to be your main work tool.

As a backup inspection lamp and a work tool always at hand wherever you go in the workshop – the D0 is a perfect solution. It weights only 50 gram and can be clipped onto either a shirt pocket or a belt.

D2 14052

The D2 is a high quality inspection lamp designed to “do the job” in modern workshop environments.

Used as an inspection lamp, it provides a light output of 250 lumen. It also has a built-in torch in the top. This torch will provide a light output of 80 lumen – enough to light up hidden gems.

The D2’s design and construction is super robust and it will not let you down even when used in a tough environment. It comes with built-in magnets in both the bottom and on the backside of the product allowing for fastening in various different positions. If more flexibility is needed, the head of the inspection lamp can be twisted 180 degree. In short, D2 is a super flexible inspection lamp.

D4 14054

Ultra slim hand lamp with high CRI

Elwis D4 has been designed for use in industrial and automotive workshops. The hand lamp comes with a strong magnet in the bottom, it can be twisted 120 degrees and we have added a flashlight to the top end of the hand lamp. The result is a hand lamp perfect for work in ie. the engine compartment of a car or truck.

We have also designed D4 with CRI 95+ to offer a light color as close to natural light as possible. In many automotive garages this is appreciated when searching for scratches etc.

The hand lamp is rechargeable and we have designed it with a low battery warning – the charging level indicator starts to flash before battery turns off. We deliver the D4 with 4 silicone rubber bands in different colors. These can be fitted to the hand lamp to offer easy identification of the lamp.

D6 14056

Very durable hand lamp with high CRI

The D6 hand lamp is a handy and very durable hand lamp that comes with CRI 95+ to offer a light color as close to natural light as possible. In many automotive garages this is appreciated when searching for scratches or when one inspects ie. paint finish.

The hand lamp comes with a strong magnet in the bottom and a strong hook in the top. We have added a flashlight to the top end of the hand lamp.

The hand lamp is rechargeable and we have designed it with a low battery warning. The charging level indicator starts to flash before the battery turns off.

We deliver the D6 with 4 silicone rubber bands in different colors. These can be fitted to the hand lamp to offer easy identification of the lamp.

TASK LAMPS

We are extremely proud of our Task lamps for all demanding professional users. Some years ago, one of our sellers asked the simple question: *Why are all task lamps so boring to look at ... why can't we develop a series of task lamps with a smart new design?*

We rose to the challenge, allied ourselves with a brilliant product designer and began from scratch with a development project that has resulted in the new TL5000 and TL5000-R lamps.

We dare say that... These are the smartest task lamps on the market and will be a joy to all who use them.

TL2000-R 80040A

The TL2000-R is an aesthetically pleasing and exceptionally robust task lamp with built-in rechargeable battery for both indoor and outdoor use.

It's a lamp that takes the words mobility and flexibility to a completely new level. With a total weight of less than 900 g (!!), and a width/height of just 23 x 20 cm, this is a lamp that really is easy to carry around in your toolbox.

The TL2000-R delivers an output of 2000 lumen and comes with a state-of-the-art "diffused lens".

When required the TL2000-R also has a low-power mode with an output of 800 lumen. All this makes it a fantastically versatile and easy to use work light that is also safe and gentle on the eyes and can be adjusted to suit you.

We have designed the TL2000-R with a battery indicator so you can always check the power status of your rechargeable battery. When it's time to recharge the battery, the lamp can also be used in low-power mode while recharging. Anyone using these lamps on an everyday basis knows how useful this can be.

Accessories for the TL2000-R
